IDEA-FAST

Year in Review

December 2023

Message from the Project Leaders

Dear all,

As 2023 draws to a close, we would like to say a big thank you to your contribution and dedication to the IDEA-FAST consortium.

As of December 18, 2023, with 920 participants enrolled, our study stands as one of the world's largest in wearable device research, notable for its comprehensive clinical and patient-reported outcome data.

Looking ahead, we aim to accelerate our recruitment for the COS through proactive management of the recruitment targets at each study site. We will ensure the collection of high quality clinical and digital data, advancing our data analytics pipeline, while further expanding upon our dissemination, engagement and sustainability strategies. Concurrently, we will continue to tackle ethical, legal, and data privacy challenges associated with digital assessment in a natural environment.

These achievements are a testament to the dedication, collaboration, and effective cross-functional efforts of all consortium partners across the various work packages.

Finally, we wish you a very happy Christmas / festive season and a successful 2024.

Yours sincerely,

Fai, Walter, Nikolay, Geert, Dave and Mike
